## SECTION 5: Firefighting measures

- 5.1 Suitable extinguishing media
- Use media that is appropriate to treat surrounding fire. Consider alcohol-resistant foam, carbon dioxide, regular dry chemical, or water spray. Avoid heavy stream of water. Self contained breathing apparatus is required.
- 5.2 Special hazards arising from the substance or mixture
- Evolves carbon dioxide, carbon monoxide or hydrocarbon fumes upon combustion.
- 5.3 Special protective actions for fire-fighters
- Move container from fire area if it can be done without risk. Do not scatter spilled material with high pressure water streams. Use extinguishing agents appropriate for surrounding fire. Avoid inhalation of material or combustion by-products.
- Fire fighters should wear self-contained breathing apparatus with full face piece operated in positive pressure mode and protective clothing to prevent contact with skin and eyes.

## SECTION 6: Accidental release measures

- 6.1 Personal precautions, protective equipment and emergency procedures  
Ventilate the area. Wear appropriate protective equipment as specified in section 8. Avoid dust formation and avoid inhalation of dust. Use a respirator or a combination filter. Keep unnecessary personnel away.
- 6.2 Environmental precautions  
Place contaminated materials in disposal containers and dispose of in a manner consistent with applicable regulations. Contact local environmental or health authorities for approved disposal of this material. Do not dispose in canals, surface water, or ground water.
- 6.3 Methods and material for containment and cleaning up  
Sweep, shovel, or vacuum up the material. Avoid any excess dust formation. Use caution as product may be slippery when wet. Keep product out of sewage and drainage systems and all bodies of water. Clean spills immediately. Ventilate the contaminated area. Thoroughly wash the area with water after a spill.

## SECTION 7: Handling and storage

- 7.1 Precautions for safe handling  
Avoid contact and inhalation. Do not get in eyes, on skin, on clothing. Wash thoroughly with soap and water after handling. The use of respiratory protection is advised when dust concentrations exceed any established exposure limits (see section 8).
- 7.2 Conditions for safe storage, including any incompatibilities  
Store in a cool, dry place. Open containers should be resealed. Shelf life under these conditions is 18 months.

## SECTION 8: Exposure controls/personal protection

- 8.1 Control parameters  
Component (CAS#): Calcium carbonate (CAS#: 471-34-1)  
TLV: 10 mg/m<sup>3</sup> TWA  
PEL: 15 mg/m<sup>3</sup> TWA (inhalation total); 5 mg/m<sup>3</sup> TWA (inhalation respirable)
- 8.2 Appropriate engineering controls:  
Use process enclosure, general dilution ventilation, or local exhaust systems, where necessary to maintain airborne dust concentrations below the applicable regulations. A system of local and/or general exhaust is recommended to keep employee exposures below the Airborne Exposure Limits.
- 8.3 Individual protection measures  
Eye/face: Protective goggles or face shields.  
Skin: Wear impervious gloves and general purpose overalls with elasticized cuffs and leg bottoms. Persons with allergies should avoid exposure.  
Respiratory: Wear a dust mask or other appropriate approved respiratory protection when effective engineering controls are not feasible or during operations that generate airborne dust concentrations exceeding the relevant standards. A respiratory protection program that meets applicable

requirements whenever workplace conditions warrant a respirator's use.  
Persons with allergies should avoid exposure.
