Section 1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND OF THE COMPANY/UNDERTAKING

1.1 Product identifier

Product name: Haifa-MKP
Trade names: Monopotassium phosphate; Haifa-MKP; Hi-M 235;
Synonyms: Phosphoric acid, monopotassium salt; MKP; Potassium dihydrogenorthophosphate; Potassium Phosphate, Monobasic; Potassium Dihydrogen Phosphate
Chemical formula: $\text{KH}_2\text{PO}_4$
Fertilizer formula: 0-52-34
Product type: Solid
CAS number: 7778-77-0
EC number: 231-913-4
REACH registration no(s): 01-2119490224-41

1.2 Relevant identified uses of the substance or mixture and uses advised

Use of the substance/preparation: Agriculture – fertilizer, component of mixed fertilizers, nutrient supplement.
Pharmacopoeia- buffering agent, component of fermentation media.
Food processing- buffer agent, mineral nutrient.
Industries- metal, textile, paper.

1.3 Details of the supplier of the safety data sheet

Company/undertaking identification
European Importer: Haifa Chemicals Northern Europe
Generaal de Wittelaan 17, bus 16,
B-2800 Mechelen, Belgium
Tel: +32-15-270811
E-mail: hichem@hichem.be

Other Countries Importer
Supplier/Manufacturer: Haifa Chemicals Ltd.
P.O.B 10809, Haifa Bay 26120, Israel
Tel: +972-4-8469616
Fax: +972-4-8469953/5

E-mail address of person responsible for this SDS: info@haifachem.com

1.4 Emergency telephone number
Emergency telephone number (with hours of operation): +972-4-8469616
CHEMTREC (U.S.): 1-800-424-9300
Section 2. HAZARDS IDENTIFICATION

2.1 Classification of the substance or mixture

Classification in accordance to Regulation(EC) No. 1272/2008 (CLP/GHS)

<table>
<thead>
<tr>
<th>Ingredient name</th>
<th>GHS Classification</th>
</tr>
</thead>
<tbody>
<tr>
<td>Monopotassium phosphate</td>
<td>-</td>
</tr>
</tbody>
</table>

Classification according to Directive 67/548/EEC (DSD) or 1999/45/EC

<table>
<thead>
<tr>
<th>Ingredient name</th>
<th>EU Classification</th>
</tr>
</thead>
<tbody>
<tr>
<td>Monopotassium phosphate</td>
<td>-</td>
</tr>
</tbody>
</table>

See section 16 for full text of the R phrases or H statements declared above.
See section 11 for more detailed information on health effects and symptoms.

2.2 Label elements

Labeling in accordance with Regulation 1272/2008 (CLP)

Hazard pictograms: Not required

Signal word: Not classified

Hazard statements: Not classified

Precautionary Statements: Not required

2.3 Other hazard

Substance meets the criteria for BBT according to Regulation (EC) No. 1907/2006, Annex XIII: Not applicable

Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII: Not applicable

Other hazard which do not result in classification: Not applicable
Section 3. COMPOSITION/INFORMATION ON INGREDIENTS

Substance/preparation: Mono-constituent substance

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in section 8.

Section 4. FIRST AID MEASURES

4.1 Description of first aid measures

**Eyes contact:** In case of contact with eyes, rinse immediately with plenty of water. Get medical attention if irritation occurs.

**Skin contact:** Avoid prolonged or repeated contact with skin. After handling, always wash hands thoroughly with soap and water. Get medical attention if irritation develops.

**Inhalation:** Avoid breathing dust. If inhaled, remove to fresh air.

**Ingestion:** If large quantities of this material are swallowed, call a physician immediately. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person.

4.2 Most important symptoms and effects, both acute and delayed

**Potential acute health effects**

**Inhalation:** Dusts may cause coughing and sneezing.

**Ingestion:** Ingestion of large quantities may cause gastrointestinal irritation, vomiting and diarrhea.

**Skin contact:** The material is none irritating to intact skin when applied topically to rabbits.

**Eyes contact:** Slight eye irritant in male and female rabbits.

**Over-exposure sigh/symptoms:**

**Eyes contact:** No special data

**Inhalation:** Coughing and sneezing

**Ingestion:** No special data

**Skin contact:** No special data

4.3 Indication of any immediate medical attention and special treatment needed

**Notes to physician:** In case if inhalation of decomposition products I a fire, symptoms may be delayed. The exposure person may need to be kept under medical surveillance for 48 hours.
Special treatments: No specific treatment

Section 5: Fire-Fighting Measures

5.1 Extinguishing media
Suitable: Use an extinguishing agent suitable for surrounding fire.
Not suitable: N/A

5.2 Special hazards arising from the substance or mixture
Non-combustible.
Hazardous thermal decomposition products: Under fire - oxides of phosphorous, oxides of potassium

5.3 Advice for firefighters
Special protective equipment for fire fighters: Fire-fighters should wear appropriate protective equipment and self contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
Remark: Move containers from fire area if possible to do so without risk.

Section 6: Accidental Release Measures

6.1 Personal precautions, protective equipment and emergency procedures
Wear protective clothing. Ventilate area of spill.

6.2 Environmental precautions
Do not let this chemical enter the environment. Avoid contact of spilt material and runoff with soil and surface waterways.

6.3 Methods and materials for containment and cleaning up
Small spill: Use a tool to scoop up solid material and place into an appropriate labeled waste container. Do not mix with sawdust or other combustible material. Avoid creating dusty conditions and prevent wind dispersal. Keep out of waterways.
Large spill: As for small spill

Personal Protection in Case of Large Spill: Safety glasses. Full suit. Dust respirator. Boots. Gloves. A self-contained breathing apparatus should be used to avoid inhalation of the product.

6.4 Reference to other sections
See Sections 1 for emergency contact information
See Section 8 for information on a appropriate personal protective equipment
See Section 13 for additional waste treatment information

Section 7: Handling and Storage

7.1 Precautions for safe handling
Handling: Avoid creating dusty conditions and prevent wind dispersal. Avoid all possible sources of ignition (spark or flame). Avoid contamination by any source including metals, dust and organic materials.
Hygiene Measures:
Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also section 8 for additional information measures.
7.2 Conditions for safe storage, including any incompatibilities

Storage: Store and use away from heat, sparks, open flame or any other ignition source. Avoid contact with combustible materials. Prevent moisture pick-up in handling and storage. Packaging materials Recommended: Use original container.

7.3 Specific end use(s): N/A

Section 8: Exposure Control / Personal Protection

8.1 Control parameters

Occupational exposure limit values: N/A
Derived effects levels:

Recommended occupational and consumer exposure limit values (following from the preformed CSA):

<table>
<thead>
<tr>
<th>Exposure pattern</th>
<th>Derived No Effect Level (DNEL)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Workers</td>
</tr>
<tr>
<td>Oral</td>
<td>N/A</td>
</tr>
<tr>
<td>Dermal</td>
<td>N/A</td>
</tr>
<tr>
<td>Inhalation</td>
<td>4.07 mg/m³</td>
</tr>
</tbody>
</table>

8.2 Exposure controls

Engineering Measures
Use process enclosures, local exhaust ventilation, or others engineering controls to keep airborne levels below recommend exposure limits. If user operations generate dust, fume or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit. Personal Protective measures

Occupational exposure controls:

Respiratory protection: Disposable particulate mask. Be sure to use an approved/certified or equivalent. Wear appropriate respirator when ventilation is inadequate.

Hand protection: Wear protective disposable vinyl gloves to prevent skin exposure.

Eye protection: Wear protective safety glasses.

Skin protection: Wear appropriate long-sleeved clothing to minimize skin contact.

Hygiene measures: Keep away from foodstuffs and beverages. Do not eat, drink or smoke during work time. Remove soiled or soaked clothing immediately. Clean skin thoroughly after work; apply skin cream. During use, provide suitable ventilation.

Environmental exposure controls: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
Section 9: Physical and Chemical Properties

9.1 Information on basic physical and chemical properties
Appearance: Solid (crystalline or granular powder), White or colourless
Odour: Odorless
Odour threshold: Odorless
pH: 4.2 to 4.9 (Conc. (%w/w): 1%) [Acidic]
Initial boiling point/boiling range: > 723°K
Flash point: Not applicable
Evaporation rate: Not volatile (butyl acetate=1)
Flammability: Not flammable
Upper/lower flammability or explosive limits:
Vapor pressure: 4.5x10^-15 Pa at 25°C - Not Volatile
Vapor density: Not volatile
Relative Density: 2.33 at 25.1±0.5°C (water=1)
Solubility(ies): Water solubility- 208 g/L at 20°C±0.5°C - very soluble
Partition coefficient Octanol/Water: The product is more soluble in water; log(octanol/water)<1
Auto-ignition temperature: Not applicable
Decomposition temperature: > 175°C (347°F) - release of water of constitution, becomes polyphosphates
Viscosity: Not viscous
Explosive properties: Not explosive
Oxidizing properties: Not oxidizer

9.2 Other information:
Melting point/Freezing point: > 252.6°C
Molecular weight: 136.09
VOC: Not an organic compounds
Apparent (Bulk) Density: 0.8 – 1.2 g/cm³
Miscibility: Not applicable
Fat solubility: Not applicable
Conductivity: Not applicable
Gas group: Not applicable

Section 10: Stability and Reactivity

10.1 Reactivity
No specific test data related to reactivity available for this product or its ingredients

10.2 Chemical stability
The product is stable under normal handling and storage conditions described in Section 7. Reacts with acids and alkalis

10.3 Possibility of hazardous reactions
Under normal conditions of storage and use, hazardous reactions will not occur.

10.4 Conditions to avoid
Extreme humidity, excess heat.

10.5 Incompatible materials
Strong oxidizing agents, strong bases, moisture.
10.6 Hazardous Decomposition products:
Under fire- oxides of phosphorous, oxides of potassium.

Section 11: Toxicological Information
11.1 Information on toxicological effects

Acute toxicity:

<table>
<thead>
<tr>
<th>Product/ingredient name</th>
<th>Test</th>
<th>Species</th>
<th>Dose</th>
</tr>
</thead>
<tbody>
<tr>
<td>Monopotassium phosphate</td>
<td>LD50, oral</td>
<td>Rat</td>
<td>&gt; 2000 mg/kg</td>
</tr>
<tr>
<td>LD50, dermal</td>
<td>Rabbit</td>
<td>&gt; 2000 mg/kg</td>
<td></td>
</tr>
</tbody>
</table>

Irritation and corrosivity:

Inhalation: Dusts may cause coughing and sneezing.

Ingestion: Ingestion of large quantities may cause gastrointestinal irritation, vomiting and diarrhea.

Skin contact: The material is none irritating to intact skin when applied topically to rabbits.

Eyes contact: Slight eye irritant in male and female rabbits.

Sensitization: Not sensitizing

Chronic toxicity:
Carcinogenicity: This product does not contain any substances that are considered by IARC, NTP, OSHA, EU or ACGIH to be “probable” or “suspected” human carcinogens.

Mutagenicity: Sodium and potassium phosphates are routinely used in the nutrient broths that support bacterial colonies in the laboratory and as such bacteria are constantly exposed to these inorganic phosphates. In addition, sodium orthophosphates are also found in the metabolic activation mixture (e.g. S9-mix) which is used in an AMES test to determine whether a test chemical can be metabolized within the body to produce a compound that may be genotoxic. The constant exposure of bacteria to these materials suggests that they pose no inherent risk of genotoxicity.

Reproductive toxicity: Under the conditions of the study on potassium dihydrogenorthophosphate, the test material administered to pregnant rats for 10 days up to a dose level of 282 mg/kg bw showed no maternal or developmental toxicity. The NOAEL for both maternal and fetotoxicity is > 282 mg/kg bw. When the test material was administered to pregnant mice for 10 days up to a dose level of 320 mg/kg bw showed no maternal or developmental toxicity. The NOAEL for both maternal and fetotoxicity is > 370 mg/kg bw. It is not considered to be scientifically justified to further investigate the effects of potassium dihydrogenorthophosphate on developmental or maternal toxicity and as such no classification is proposed for this endpoint and no further studies are deemed necessary.

Specific target organ toxicity (single exposure): Not applicable.

Specific target organ toxicity (repeated exposure): Not applicable.

Aspiration hazard: Not applicable.

Other effects
Over exposure signs/symptoms: No specific data.

Target organs: No specific data.

Toxicokinetics (absorption, metabolism, distribution and elimination):

A particle size distribution study has shown approximately > 50% of the particle is less than 100 µm (inhalable). As the substance is not lipophilic it would not have the potential to be absorbed directly across the respiratory tract epithelium. However the very high water solubility of the substances and the low molecular weights does indicate that it has the potential to be absorbed through aqueous pores or be retained in the mucus. Particles deposited on the mucociliary blanket will be swallowed in the mouth (ingestion). Therefore absorption from the gastrointestinal tract will contribute to the total systemic burden of the substance that is inhaled.

Orthophosphates contain ionisable groups which may aid gastrointestinal tract absorption. The group 1i substances are very highly water soluble (>10000 mg/l) therefore should readily dissolve into the gastrointestinal fluid. Also small molecular weights (120-214), may aid the substance to pass through aqueous pores or to be carried through the epithelium barrier by the bulk passage of water.

The very high water solubility suggests that the substance is too hydrophilic to cross the lipid rich environment of the stratum corneum. Also the molecular weight of >100 and the extremely hydrophilic nature of the substance leads to the conclusion that dermal uptake of the substance will be minimal.

The results of the acute oral toxicity study in the rat showed no evidence of significant systemic toxicity; even at relatively high dose levels. This suggests that the test material is either of low toxicity or there is little absorption of the material following oral ingestion.

---

### Section 12: Ecological Information

#### 12.1 Toxicity

12.4 Mobility in soil
Soil/water partition coefficient (Koc): N/A

Mobility: Soluble in water.

12.5 Results of PBT and vPvB assessment
Not applicable

12.6 Other adverse effects
Substances which have an unfavorable influence on the oxygen balance and can be measured using parameters such as BOD, COD, etc.: Absent

Substances, which contribute to eutrophication: Phosphates, 52% as P₂O₅

Section 13: Disposal Considerations

13.1 Waste treatment methods
Provisions relating to waste: Directive 2008/98/EC on waste, of 19 November, 2008: Depending on branch of industry and production process, also other EURAL codes may be applicable
06 03 14: solid salts and solutions other than those mentioned in 06 03 11 and 06 03 13

Product
Methods of disposal: Waste must be disposed of in accordance with federal, state and local environmental control regulations.

Hazardous waste: N/A.

Packing
Empty containers should be taken for local recycling, recovery or waste disposal.
Section 14: Transport Information

International transport regulations

14.7 Transport to bulk according to Annex II of MARPOL 79/78 and the IBC Code
Not applicable

Section 15: Regulatory Information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture
EU Directives 67/548/EEC and 1999/45/EC (including amendments) and take into account the intended product use

15.2 Chemical safety assessment
In accordance with REACH article 14, a Chemical Safety Assessment has been carried out for this substance.

Section 16: Other Information

Full text of R-phrases referred to in sections 2 and 3: N/A
Safety phrases: N/A

Full text of Hazards Statements referred to in sections 2 and 3: N/A
Precautionary Statements: N/A

Training advice: Before using/handling the product one must read carefully present MSDS.
Recommended restriction: N/A
Key Legend Information:
ACGIH- American Conference of Governmental Industrial Hygienists
OSHA- Occupational Safety and Health Administration
NTP- National Toxicology program
IARC- International Agency for Research on Cancer
ND- Not Determined
N/A- Not available
R-phrases- Risk phrases
S-phrases- Safety phrases

Date of issue: 30th November 2010
